What To Look For:
A Historic Well in Winfield Mounds Forest Preserve

Thirsty travelers on the Illinois Prairie Path Geneva Spur can now find drinking water at a new pump beside the trail east of the West Branch of the DuPage River. There was plenty of good, clean water at this site when Native American people of the Middle Woodland, (300 B.C. to 800 A.D.), and Late Woodland, (800 to 1600 A.D.), cultures fished, hunted and probably farmed living in small settlements beside the river. Only a few arrowheads and pieces of pottery in long-forgotten mounds now remain to mark their passing. After the defeat of Chief Black Hawk in 1832, the next inhabitants were white settlers who began to farm in the Winfield area in the mid-1800s. With their coming the river water gradually became polluted and insufficient in quantity to satisfy the needs of a rapidly-growing population, so wells had to be dug by the new landowners and by the Village of Winfield. These wells sufficed until this year when the village began to receive water via pipeline from Lake Michigan. Most of the wells have now been capped.

The old well recently restored to service in the Winfield Mounds Forest Preserve was originally dug by a pioneer in the plastics industry named Harold Warp, who invented Flex-O-Glass and was the first manufacturer of polyethylene food wrap, “Jiffy Wrap.” Mr. Warp built for his personal use a one-room summer cabin near his well and also a small footbridge over the river. It was a peaceful refuge in warm weather for a captain of industry. In 1970 the Warp family sold almost 120 acres of land to the Forest Preserve District of DuPage County for inclusion in the fledgling Winfield Mounds Forest Preserve.

During the winter of 1971-72 Dan Griffin (now director of resource management for the forest preserve district but then just an intern fresh out of college) lived with his wife in the tiny uninsulated, closetless Warp cabin with its two small electric space heaters and a wood-burning fireplace. “The wind blew through every crack and sometimes the curtains stood straight out from the windows,” says Dan. “The water

continued on page 2
According to the October-December 1996 issue of the National Rails-To-Trails Conservancy newsletter, Trailblazer, the Illinois Prairie Path is not the nation’s first rail-trail. That honor, we are told, actually belongs to a picturesque one-mile-long sandy footpath named the Cathedral Isle Trail in Aiken, South Carolina, which opened to the public in 1939. We are not surprised to read this because we know of at least one other abandoned rail line right here in Kane County which was acquired for public use in the 1940s, some twenty years before the Prairie Path. However, it wasn’t until long after the Illinois Prairie Path attained national fame that the beautiful Virgil L. Gilman Trail was built on the right-of-way.

We have always said that the Illinois Prairie Path, built by volunteers, is America’s first great rail-trail and, furthermore, that our founder, naturalist and lifelong hiker May Theilgaard Watts, started the rail-trail movement in the United States with her letter to the editor of the Chicago Tribune, published September 30, 1963. Three weeks after her letter appeared eighty people, inspired by her proposal to convert an abandoned railroad into a long multi-purpose trail, joined her for a hike on the “future footpath.” This was the actual de facto public opening of the trail because we never had a formal ceremony. Today the Illinois Prairie Path is fifty-five miles long and generates more than 300,000 person-trips annually — two measures of its status as a great trail.

The national rail-trail movement also began right here in 1963 with Mrs. Watts’ letter in the Chicago Tribune, a newspaper of national importance. The national spotlight shone on our trail again on February 8, 1965 when President Lyndon B. Johnson included in his Message on Natural Beauty Of Our Country (Lady Bird Johnson’s favorite cause) a section on trails containing this sentence: “In Illinois an abandoned railroad right-of-way is being developed as a ‘Prairie Path.’” Ours was the only rail-trail recognized so early at the national level. See page 3.

On June 2, 1971, during the Nixon Administration, May Watts was invited to Washington to represent the whole trails community when the first group of National Recreation Trails was designated (the Prairie Path had been first to apply for that honor). In 1976 the Illinois Prairie Path was the only rail-trail project singled out for national recognition during the Ford Administration in the Horizons on Display American Bicentennial Program; and in 1988 the volunteers of The Illinois Prairie Path were national finalists in the Take Pride in America Program during the Reagan Administration.

No other long and well-loved rail-trail, especially one begun and maintained for more than twenty years by hundreds of volunteers, has received so much national recognition. We think our claim to be the first great rail-trail which started the American rail-trail movement stands.
NATURAL BEAUTY OF OUR COUNTRY

MESSAGE

FROM

THE PRESIDENT OF THE UNITED STATES

TRANSMITTING

A MESSAGE ON NATURAL BEAUTY OF OUR COUNTRY

February 8, 1965.—Referred to the Committee of the Whole House on the State of the Union and ordered to be printed

To the Congress of the United States:

For centuries Americans have drawn strength and inspiration from the beauty of our country. It would be a neglectful generation indeed, indifferent alike to the judgment of history and the command of principle, which failed to preserve and extend such a heritage for its descendants.

Yet the storm of modern change is threatening to blight and diminish in a few decades what has been cherished and protected for generations.

A growing population is swallowing up areas of natural beauty with its demands for living space, and is placing increased demand on our overburdened areas of recreation and pleasure...

The forgotten outdoormen of today are those who like to walk, hike, ride horseback, or bicycle. For them we must have trails as well as highways. Nor should motor vehicles be permitted to tyrannize the more leisurely human traffic.

Old and young alike can participate. Our doctors recommend and encourage such activity for fitness and fun.

I am requesting, therefore, that the Secretary of the Interior work with his colleagues in the Federal Government and with State and local leaders and recommend to me a cooperative program to encourage a national system of trails, building up the more than hundred thousand miles of trails in our national forests and parks.

There are many new and exciting trail projects underway across the land. In Arizona, a county has arranged for miles of irrigation canal banks to be used by riders and hikers. In Illinois, an abandoned railroad right-of-way is being developed as a "Prairie Path." In (New) Mexico utility rights-of-way are used as public trails.

As with so much of our quest for beauty and quality, each community has opportunities for action. We can and should have an abundance of trails for walking, cycling, and horseback riding, in and close to our cities. In the back country we need to copy the great Appalachian Trail in all parts of America, and to make full use of rights-of-way and other public paths...

The beauty of our land is a natural resource. Its preservation is linked to the inner prosperity of the human spirit.

The tradition of our past is equal to today's threat to that beauty. Our land will be be attractive tomorrow only if we organize for action and rebuild and reclaim the beauty we inherited. Our stewardship will be judged by the foresight with which we carry out these programs. We must rescue our cities and countryside from blight with the same purpose and vigor with which, in other areas, we moved to save the forests and the soil.

LYNDON B. JOHNSON.

THE WHITE HOUSE, February 8, 1965.
REPORT ON ANNUAL MEETING

The Illinois Prairie Path annual meeting held on November 3, 1996 at the Abbey in Elmhurst provided a fitting climax to an eventful year for trails. About sixty attendees enjoyed the festivities.

President Paul Aeschleman mentioned the year’s major volunteer projects: the annual spring cleanup, restoration work at several prairies on or near the Prairie Path, and the events of National Trails Day on June 1, including the installation of the Geneva Spur sign, which marked the Grand Opening of that nine-mile trial segment; the naming of the Jack T. Knuepfer Bridge; and the return of the Grand Illinois Trail Adventurers. He touched on projects which the board is currently planning, such as a proposed drinking fountain at the new Prairie Meadows development on the Elgin Branch south of North Avenue and the new mile markers to be made of plastic/wood composite, which is practically indestructible. He showed a model of the acrylic green-and-white mile numbers identified by the IPP logo and trail segment name; for example, Geneva Spur. The membership approved the prototype as designed by Jean Mooring and produced by Legible Signs Inc. of Rockford.

Treasurer Steve Plumb reported that this had been a good year for the Path financially and that we had ended in the black, thanks to the membership recruitment efforts of David Tate. The complete Treasurer’s Report with pie charts appears on the back cover. The most expensive items in the budget are the Office Manager at 20% and the Newsletter at 19%.

Membership Chair David Tate used view graphs and handouts to illustrate the fact that the support of our members is steadily increasing and that as a result our cash balance is rebounding from the low point reached in 1993.

See bar graph. As a humorous reward for their outstanding efforts, David Tate and Linda Plumb, our hardworking office manager, each received a can of “Great Stuff.”

Paul Aeschleman spoke briefly about goals and objectives and proposed projects for The IPP in 1997, asking for a show of hands on each. The membership indicated varying degrees of interest in goals ranging from fundraising and increasing membership involvement to special projects like an IPP/Chicagoland Bicycle Federation safety survey of all our road crossings or an IPP/Rails-to-Trails Conservancy invitational bike ride. The results were not tallied.
The business meeting ended with the re-election by acclamation of four board members whose terms were expiring: Paul Aeschleman, Paul Mooring, Steve Plumb and David Tate.

The featured speakers of the day were Mike Ulm, executive director of the Illinois Rails-to-Trails Conservancy in Springfield, and George Bellovics, landscape architect and Grand Illinois Trail coordinator for the Illinois Department of Natural Resources, based in Dixon. Mike began the slide show of last May’s 475-mile Grand Adventure by remarking that the Illinois Prairie Path is known across the country as one of the great rail-trails. Bicyclist Mike and his fellow Adventurer horsewoman Kandee Hartel, accompanied by Kandee’s husband driving a sag wagon and horse trailer, covered the whole distance in three weeks and saw beautiful old canals, historic industrial sites, tunnels and charming bridges, the mighty Mississippi River, the rolling hills of Jo Daviess County, ancient forests, fields of corn and soybeans, friendly country towns, some wonderful existing trails, and of course the spectacular Chicago skyline. They also met many enthusiastic trail fans and political leaders as they made their pioneering way across northern Illinois. Although they experienced more than their share of rainy days, they had a great time and felt that the Grand Celebration on the Prairie Path Geneva Spur in West Chicago was an inspiring climax. There is a good chance that the Grand Illinois Trail will be largely complete by the Year 2000. Certainly the southern leg, which consists mainly of the Centennial Trail, the Illinois-Michigan Canal Trail and the Hennepin Canal Trail and which is a part of the coast-to-coast American Discovery Trail, will be finished by then.

George Bellovics of IDNR discussed many trail plans which are in the works now: a connector trail from the Fox River Trail to the I and M Canal; surfacing of the Old Plank Road Trail from Park Forest to New Lenox; a trail at the Midewin National Grassland (former Joliet Arsenal); improvements to the Centennial Trail, the Hennepin Canal Trail, the Great River Trail, and our IPP Cook County section. This last project will go out for bids soon, and it is hoped that construction can start in the spring of 1997. George explained that a small parking lot and some landscaping are planned for First Avenue, Maywood; the Path will be blacktopped from First Ave. to Taft Ave. in Hillside; the Path will go under the Indiana Harbor Belt Railroad (“The Catacombs”) in Bellwood and will have chain-link fencing in that section; the old bridge at Addison Creek will be removed and a new one built; lighting will be provided in Maywood; Bellwood may provide its own lighting later; a bridge is planned to cross the Des Plaines River and it is hoped the Cook County DOT will take responsibility for it.

The last featured speaker was Jean Mooring, who presented the annual Prairie Path slide show, written by Paul Mooring. The show highlighted the major events of the year with special emphasis on the tremendous contributions of the DuPage County Division of Transportation to the improvement of the Regional Trail System. Jean also mentioned problem areas, such as the continuing Commonwealth Edison powerline threat to the Aurora Branch in Warrenville, and vandalism to our bench near Lake Arrowhead in Wheaton and to our display case at Westmore in Lombard. She wound up with pictures of happy Path users, colorful native wildflowers on the right-of-way, and peaceful scenes viewed from the trail.

The meeting concluded with the traditional cider, cakes and cookies provided by past and present board members and/or spouses.

May 27, 1996. Using methyl alcohol and much elbow grease Paul Mooring removes letters LK (for Latin Kings) and gang symbol from display case at Westmore, Lombard.

October 27, 1996. Vandals have now ripped off the door, stolen the materials on display and dented the cork board.
Dear Members and Friends,

This is my valedictory as editor of The Illinois Prairie Path Newsletter.

I have been writing the Newsletter since 1980, sixteen years, more than half the time that our not-for-profit corporation has been in existence. I followed in the footsteps of the late Helen Turner, Bobbie Lively, and Louise Headen, each of whom had much to teach me. I have tried to develop a high quality product, which would maintain the standards set by my predecessors. For example, from the earliest days our newsletter has had a distinctive front page, featuring either nature notes or historical vignettes illustrated by local artists. These generous donors of time and talent included Helen Turner, May Watts, Bobbie Lively, Henrietta Tweedie, Mark and Jo Mayeau, and in recent years Susan Terwedow, who is not only an artist but also a dedicated runner and columnist for the Daily Herald.

Since I took over as Newsletter Editor, many good things large and small have happened to the Prairie Path; and I have taken great pleasure in writing about them and in photographing them for the Newsletter and for the annual meeting slide show. To report these events properly I have attended virtually every board meeting since 1980 and also most of our work days and special projects (I have been actually doing all this since the early '70s). During my tenure as editor one of our most important achievements was the almost miraculous completion of Volunteer Bridge in 1983 through the joint effort of some eighty volunteers. Another was the official recognition of Illinois Prairie Path as the trail name in 1991 by the DuPage County Board as a result of our long lobbying effort. Still another was the publication of our outstanding full-color trail map in 1994. In 1984 the fortunes of the Path took a mighty leap forward when, under the leadership of DuPage County Board Chairman Jack T. Knuepfer, the DuPage County Division of Transportation began to take responsibility for regular maintenance of the trail, including surfacing, mowing, pruning, and building bridges. In recent years DuPage County has built bridges over Klein Creek on the Elgin Branch, over railroad tracks at Reed-Keppler Park on the Geneva Spur, and over Eola Road on the Aurora Branch. The Illinois State Toll Highway Authority built a major bridge over I-355; and the Illinois Department of Transportation built bridges over Salt Creek, Rte. 83 and Rte. 59 plus underpasses at Butterfield Road and North Avenue. The Kane County Forest Preserve District and the Fox Valley Park District have made many improvements to their sections of the Prairie Path in Kane County as have virtually all the municipalities along the trail.

This year, 1996, saw the greatest event of my time as Newsletter Editor: the completion of the Illinois Prairie Path Geneva Spur and the building of yet another bridge by the DuPage County DOT, this one over the West Branch of the DuPage River in the Winfield Mounds Forest Preserve. My husband Paul and I have been working and hoping for this triumphant outcome since the late '60s. Now it has finally happened; and I think this is a good time for me to retire from the board of directors, although I remain a life member of The Illinois Prairie Path.

Thank you for all your support. We've had fun building a wonderful trail with a lot of help from our friends in government. Please keep up the good work and support whoever becomes your new editor with articles of interest to our users and even an occasional pat on the back! Best regards,

Jean C. Mooring
ANOTHER FOREST PRESERVE DISTRICT CONNECTING TRAIL FOR DUPAGE COUNTY

We are pleased to see that the Forest Preserve District of DuPage County has jumped on the long-distance trail bandwagon. As the largest landowner in the county, the district has built many miles of trails within its forest preserves. Now the district is beginning to connect these individual trails to the regional trail system, as The Illinois Prairie Path Board of Directors has long recommended.

Two of these connecting trails are under construction now. As mentioned in the Fall Newsletter, the trail west of County Farm Road, connecting the Prairie Path to the Great Western Trail via Kline Creek Farm in the Timber Ridge Forest Preserve, is nearing completion. Most of the grading and surfacing has been done, and a 70-foot bridge over a drainage ditch will be installed before winter. The landscaping will be completed in the spring. The total length of the trail is slightly more than one mile. The total cost of the project including the bridge will be $336,619 (incorrectly given as $221,000 in the Fall Newsletter), of which an IDOT ISTEA grant will pay 80%. Prairie Path and Great Western Trail users will be glad to know that this new trail will make the parking lot at Kline Creek Farm available to them. There also are plans for a $575,000 visitor center near the parking lot at Kline Creek Farm. Amenities will include a gift shop, auditorium, exhibit areas, and washrooms open to visitors from outside. Construction will start next summer with completion expected in the summer of 1998.

Construction of the second connecting trail has just begun. It will be .5 mile in length and will run from the stoplight at Winfield Road north of Butterfield Road along the ridge at the south end of Silver Lake to the main entrance at Blackwell Forest Preserve and the regional trail segment in the preserve. The $240,000 project will include a pedestrian crosswalk and pushbutton light at the Winfield Road/Butterfield Road intersection to facilitate the connection to the Illinois Prairie Path Aurora Branch. In the spring, when construction is complete, this trail section will provide beautiful views of Silver Lake.

Kline Creek Farm trail, under construction, passes by Timber Lake. A new bridge will span drainage ditch (foreground), in Timber Ridge Forest Preserve.

View of Silver Lake from new trail corridor, Blackwell Forest Preserve.

PRAIRIE WORK DAYS, rain or shine

Saturday, Feb. 15
Clear brush with Keith Olson at Great Western Prairie, Elmhurst. Meet at 9:00 a.m. at Berkley Ave. and the Illinois Prairie Path.
Leaders: Dick Wilson, (847) 299-7882
(8:00 a.m. to 6:00 p.m.);
Keith Olson, (630) 834-7357.

Saturday, March 29
Clear brush with Mel Hoff at the West Chicago Prairie along the Geneva Spur of the Illinois Prairie Path.
Leaders: Dick Wilson, (847) 299-7882
(8:00 a.m. to 6:00 p.m.);
Mel Hoff, (630) 393-4715.
